Your advantages at a glance

Either from a Barista – or simply from SiGusto Next

The innovative SiGusto Next hot drinks machine serves real coffee and chocolate speciality drinks to quality barista standards within a few seconds. Whether it be a creamy cappuccino, classic espresso, quality bean or instant product, this machine delivers variety and quality to equal any traditional Italian café.

Easy to use, Sielaff's SiGusto Next has something to suit every customer's requirement and personality. The individuality of the SiGusto Next gives you the edge over the competition: Colour of cabinet, stylish advertising panels and delivery pocket branding as well as a modern layout design.

Highly individual

16 large illuminated product decals and 2 x 16 selection buttons: The SiGusto Next offers pure originality, which delivers only high turnover. Its possibilities are endless.

An attractive proposition to appeal to all

More than 50 pre-set freely programmable drink recipes, as well as up to 64 selection button combinations: A variety of drinks that your customers will love, wherever the location.

Flexibility? Capacity? No problem with SiGusto Next

The double cup holder offers maximum capacity and absolute flexibility for different cup types and sizes: Technology from Sielaff – always one step ahead.

High quality in detail

The machine boasts high performance components from the HoReCa sector such as boiler, brewer and grinder to ensure that drinks are served to barista standards.

Prepared hot and hygienically served time after time

The closed dispense carousel ensures that products are always delivered hot and hygienically to the customer; whether in a vending cup or their own.

Easy to transport and install

The SiGusto Next stands directly on its own height-adjustable feet. As soon as it arrives, this machine is ready to generate turnover almost immediately.

Talent & Technology

Setting standards

Sometimes it takes a special type of innovation to turn heads.

Previously, vending cups had to fulfil specific requirements.

This made the cups expensive and “jams” could occur, causing machines to breakdown virtually / practically on

an almost daily basis. Sielaff has put an end to this with the launch of a new cup dispense module for all Sielaff coffee vending machines, suitable to paper and plastic cups alike.

Cup jams are now a thing of the past. Technology from Sielaff makes all the difference.

SiGusto Next operator panel

- 16 extra large, illuminated product decals
- Easy to replace product decals
- Large area for ingredients list
