Your advantages at a glance

The finest coffee at the touch of a button

Hot beverage machines from Sielaff are designed to give you great tasting coffee and reliable vending. Sielaff uses only top quality components to ensure maximum performance and longevity of key parts, such as brewer and mixers.

Sielaff 's range of drinks are perfectly developed to suit a variety of palates. This ensures that your customers' requirements are always catered for - whether it be a strong, freshly brewed coffee in Scandinavian countries, the famous Viennese Melange or the traditional extra short Italian espresso.

Promote sales with this attractive range of vendors, which is not only simple to use but also conforms to the strictest hygiene standards.

Something to suit all tastes

Excellent quality coffee is down to the product variety. The range offers two different ways of preparing high quality beverages to satisfy your customers at the touch of a button - whether by using freshly ground coffee or high-quality instant products.

Two designs – simple to use

Whatever the location, the stylish EC-design is a focal point incorporating full-length stainless steel operator panel with 14 illuminated, direct selection buttons.

The customer-friendly ES-version boasts 12 large and indirectly illuminated product decals as well as 21 individually programmable selection buttons with additional choice options such as "extra sugar" and "milk and sugar".

Success at every location

Thanks to our vending machines' low maintenance operation, profitability is guaranteed wherever the site.

The delivery of quality drinks is related to component quality

The machine boasts high performance components from the HoReCa sector, such as boiler, brewer and grinder, to ensure that drinks are served to barista standards.

Versatility to suit individual requirements

There are various variants with different container configurations to suit everybody. The Sielissimo Espresso has a bean hopper with a capacity of 4.5 kg.

Easy to transport and install

Right after delivery with a jack lift, the Sielissimo floor-standing range stands on its own height-adjustable feet. As soon as it arrives, the machine is ready to generate turnover almost immediately.

Talent & Technology

Cup dispenser module «BAM» - setting standards

Sometimes it takes a special type of innovation to turn heads. In vending, Sielaff has succeeded in achieving just this with the launch of «BAM».

Previously, vending cups had to fulfil specific requirements.

This made the cups expensive and “jams” could occur, causing machines to breakdown practically on an almost daily basis. Sielaff has put an end to this with the launch of a new cup dispense module for all Sielaff coffee vending machines, suitable to paper and plastic cups alike.

Cup jams are now a thing of the past. To change the cup type with «BAM» is simple. Even the variable setting of the cup conveyor can be set directly on the vending machine in just a few minutes. Technology from Sielaff makes all the difference.

General information

- Advertising panels can be personalised
- Simple integration of different types of payment systems
- All user features are wheelchair accessible
- Can be incorporated into a vending line
- Modular construction - easy to service and recycle

Housing

- Powder coated internal metal parts, decorative plastic in-fills are spray painted with two coats
- Internal fittings are made predominantly from polished stainless steel
- Internal illumination with door contact switch as standard
- Service socket as standard

Technology

- Pinch valves with platinum strengthened hoses
- Closable product chutes made from anti-static material
- Product dispense using swivel arm technology
- Light bar cup/pot recognition
- Hot water circulation up to the valve
- Optional: Switch for filling coffee pot

Vending Machine Controller (VMC)

- VMC-Board with flash EPROM
- Free selection programming (direct selection, pre-selection, individual mixing)
- Drink names can be easily edited
- Cup volumes are simple to adjust
- Automatic cleaning programme
- Short programme for rinsing, statistics and cup dispense
- Construction protected against short-circuiting

Payment systems (optional)

- Prepared for the fitting of standard MDB-payment systems - BDV or Executive also available
- Optional: Preparation for, or fitting of, cashless payment systems

Sales / Service data

- Complies with EVA-DTS standard
- Data transfer using mobile data capture unit (IR-interface)
- Can be telemetry-enabled
- Selector for configuring and reading out machine data

Dosage

- Depending on the machine variant: up to 50 freely programmable drink recipes
- Freely adjustable drink sizes up to a max. of 300 ml portions
- Cup dropper with a capacity of 500 cups (800 cups optional)
- Rotation and run-time of the dosing motors can be freely adjusted
- Filter counter
- “Happy Hour” function enables certain products to be time-restricted

Product variants

- Sielissimo CIS: 1 or 2 types of coffee and up to 6 instant containers
- Sielissimo CVS : 1 large bean hopper and 5 or 6 instant containers
